GAZA

IMPACT REPORT

JANUARY 2024

MUSLIM AID AUSTRALIA

 maainternational.org.au

SITUATIONAL ANALYSIS

Over 2.3 million Palestinians trapped in Gaza and thousands in the West Bank are continuing to face immense hardship, death and horrible injuries, as they face a relentless bombardment and ground invasion. Innocent civilians and children have been targeted including in hospitals, places of worship and where they are seeking refuge. There is no place left for our Palestinian brothers and sisters to seek safety.

Critical shortages in basic necessities, compounded by a comprehensive blockade, are notable. The healthcare system is on the brink, with many hospitals ceasing operations due to fuel shortages and power outages. Getting aid into Gaza has proven to be extremely challenging, but MAA has successfully been able to complete many rounds of aid distribution so far.

TIMELINE OF EVENTS

- January 2024** On January 10th 2024, team MAA dispatched a massive convoy of ten trucks to Gaza, full of winter essentials, family food packs, and hygiene kits. Currently, these trucks are on their way to those most in need in Gaza, and we expect the goods to be distributed soon in sha Allah.
- December 2023** Over a million of our displaced and traumatized Palestinian brothers and sisters in Gaza had one extra worry in December - the icy cold winter conditions. With your generous support, we were able providing essentials like warm blankets, tents, and food packs.
- Mid-November 2023** Al-Quds and Shifa Hospital announced they were out of service, deepening the healthcare crisis.
MAA CEO Ayman Eldemallawy and Sheikh Abdel Moez landed in Egypt to coordinate MAA's next phase of distribution
Five truckloads of essential food aid and medicine were dispatched to Gaza on 13th November, 2023
- Early November 2023** Attacks continued, further depleting resources and casualty figures rose. MAA locally purchased aid supplies in Gaza. We continued distributing vital aid at every possible opportunity, despite our team being under extreme danger.
- October 2023** Intensified bombardment took place, causing extensive damage to infrastructure and healthcare facilities. Hospitals were besieged and targeted, exacerbating the humanitarian crisis. MAA's emergency aid distribution commenced.
- Early October 2023** Onset of escalated violence in Gaza and the West Bank. The Palestinian Authorities declared a state of emergency and MAA swung into action by launching an Emergency Appeal.

STATISTICS

MUSLIM AID AUSTRALIA'S (MAA) INTERVENTION

Since October 2023, MAA has delivered approx **\$1.15 M** in Aid to Gaza

The pallets of medicine included:

- **Ceftriaxone:** An antibiotic for serious bacterial infections, given by injection.
- **Cefotaxime:** Another injectable antibiotic for various bacterial infections like pneumonia.
- **Esomeprazole:** Reduces stomach acid and helps with heartburn and stomach ulcers.
- **Amoxicillin:** A common antibiotic for infections like ear or urinary tract infections.
- **Clavulanic Acid:** Combined with Amoxicillin to make it more effective against bacteria.
- **Fusidic Acid Cream:** A cream for treating skin infections.
- **Tranexamic Acid:** Helps to control heavy bleeding, often used during surgery or heavy periods.
- **Ampoules:** Small sealed vials, usually for storing and injecting medicines.
- **Etamsylate:** A drug to reduce bleeding, used in various bleeding conditions.

PLANNED NEXT PHASE OF DISTRIBUTIONS

Funding of Medical Staff at 2 PRC Hospitals in Gaza for 6 months

10 Ambulances

Aid Convoys containing Food, Medicine, Baby Formula, Hygiene Packs, Tents, Blankets, and other essential items

MAA's TRIPLE R APPROACH

When a disaster strikes, MAA employs our Triple R philosophy in accordance with our disaster management protocols:

- **Relief:** Immediate emergency assistance following a disaster.
- **Recovery:** Transitioning efforts to rehabilitate lives disrupted by the event.
- **Rebuild:** Long-term vision and investment in rebuilding communities affected by calamities.

MAA's TRIPLE R APPROACH

PHASE 01

RELIEF

In the critical days following a disaster, MAA's priority is to offer immediate emergency assistance.

MAA's TRIPLE R APPROACH

PHASE 02

RECOVERY

As the immediate crisis subsides, our efforts transition to rehabilitating lives disrupted by the event.

MAA's TRIPLE R APPROACH

PHASE 03

REBUILD

With a long-term vision, MAA invests in rebuilding a future for communities impacted by calamities.

CURRENT CHALLENGES FACING AID DISTRIBUTION IN GAZA

The delivery of humanitarian aid in Gaza after the October 7th 2023 conflict has faced multiple challenges, significantly impacting the capacity to meet the urgent needs of the population.

01 Limited Supply of Essential Goods: The supplies of food, water, medicines, and fuel have been critically low since the beginning of the Israeli bombardment and siege of Gaza. This has affected the 2.3 million people residing in the area.

02 Logistical and Security Constraints: Israel's conditions for inspecting and tracking aid and security risks in transporting and distributing it have hampered the aid operation. Complexities are involved in getting the operation off the ground, mainly through the Rafah border crossing with Egypt, which has not been used for large-scale relief efforts in past conflicts.

03 Insufficient Aid Delivery: Despite the opening of the Rafah border crossing, the volume of aid getting through is just a fraction of what is needed. As of late October, only around 450 trucks had entered Gaza, falling short of the 100 trucks required daily to meet essential needs.

04 Fuel Shortages: Fuel is a critical issue, urgently needed for distributing aid and powering hospitals, bakeries, and desalination plants. Israel has banned the entry of fuel over concerns that it could be used by Hamas for military purposes. This ban has led to shortages impacting essential services used for large-scale relief efforts in past conflicts.

05 Infrastructure Damage: The ongoing bombardment has damaged roads and buildings around Rafah, complicating the delivery and distribution of aid. The only functioning mill in Gaza cannot grind wheat due to a lack of electricity and fuel, and several bakeries have been hit during the conflict.

06 Conflict and Displacement Impact: The distribution of aid on the Gaza side of the border depends on the conflict pattern and the residents' mass displacement. With the expectation of an Israeli ground operation, the situation is likely to become more complicated. Intense bombardment and security concerns, especially in northern Gaza, have led to appeals for a humanitarian pause or ceasefire to deliver relief.

07 Inspection and Inspection System Delays: There are bottlenecks in the aid delivery process, mainly related to the inspection mechanism and the ability to movement inside Gaza. This includes trucks driving extensive distances for inspections, resulting in delays.

The complexities on the ground are compounded by the volatile security conditions, loss of power and communication, and logistical constraints. Despite these daunting challenges, we are employing all available resources and continually adapting our strategies to respond and deliver aid during this critical time in Gaza and the West Bank.
